Tips of the Month

THE LATEST AND GREATEST IN SCREENS

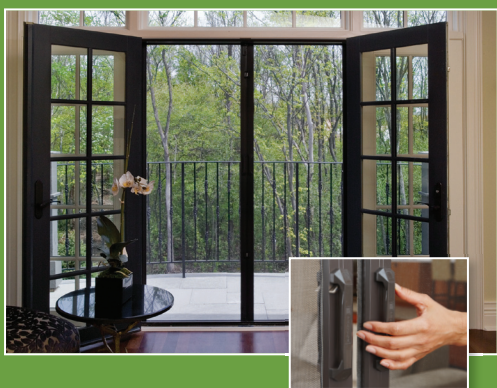

Do you like keeping your doors and windows open for fresh air, but hate insects getting in the house? Do you tire of fighting your sliding patio screen door or the BANGING of your swinging screen door? You can easily resolve these issues by installing retractable screens. The screen retracts into an attractive, nondescript housing as if it's part of your window or doorframe. Retractable screens not only complement your home, but also address other issues that you may have had with door and window screens in the past.

Keep out insects. With warmer weather come bugs. Installing retractable screens on your home allows you to open up your living space without the nuisance of insects. But retractable screens aren't just for windows and doors. You can also protect large openings such as patios, lanais, gazebos, cabanas – even your large garage door!

Preserve the design of your doorway. The last thing you want to do is cover up your beautiful entry or French doorway with an unsightly fixed screen or storm door. A leading benefit of retractable door and window screens is that they provide the utility without the unsightly appearance, making it a perfect solution for any home. Regardless of the door style, they enhance the view from both the interior and exterior.

Enjoy natural daylight. Retractable screens are the versatile and cost-effective choice for creating a more comfortable living space while reducing energy waste. For example, installing retractable screens in windows on the west side of a home will allow you to block the hot afternoon sun in the warmer months yet, when fully retracted, the screens permit the maximum warming effects of the sun in cooler months – all while preserving the view through the window.

The convenience of professional installation. We had Phantom retractable screens installed in our homes by their professional installation team. Over a decade later, they still look great, operate smoothly, protect us from pests and help lower our utility bills by providing much needed sun protection from west and south-facing windows, patio and French doors. Plus, we don't have to worry about the sun destroying our window treatments, flooring and furnishings. Go to phantomscreens.com to learn more about how Phantom's retractable screens can help you open your home to the outdoors!

Ask the Carey Brothers a home improvement or remodeling question on their live radio broadcast every Saturday from 9:00 a.m. to 1:00 p.m. Eastern Time. Call toll-free at **1-800-737-2474** to ask your question.
